

Which of these will become priorities when you become less well?

Consider your top 5 cards – what matters most to me – as well as these possible priorities:

Live for as long as I can

Have all available treatments

Quality of life over length of life

Stay out of intensive care

Die at home, if possible

Make my own decisions

Keep as much independence as possible

Be looked after

Consider other people's preferences

Avoid financial burden on others

Avoid emotional burden on family and friends

Have relief from pain and suffering

Prepare my legacy

Choose how and where I'm buried

My personal priority
