

STRONGER SECTOR,
CARING TOGETHER

Palliative Care WA Quarterly Members' Forum

Pathways to Palliative Care

From the number of calls Palliative Care WA receive, it is clear that the sector and community alike have difficulty navigating the system; who to call and where to go for help when someone is needing access to palliative care. This forum will bring together a panel of agencies that provide information and support services for palliative care inquiries.

Carol Douglas, Aged Care Nurse Practitioner, Residential Care Line Outreach Service, Sir Charles Gairdner Hospital, will lead the forum with a presentation that highlights the outcomes for an older person, with declining health living in a residential aged care setting, particularly in the absence of a 'clinical treatment plan'.

Dr Elissa Campbell, Geriatrician and Palliative Physician, will put a number of case scenarios to the panel for their advice to map and direct the best pathway to ensure timely access to quality palliative care treatment aligned with patient goals and needs. Also, attendees will have an opportunity to put forward their own scenarios.

Date: Tuesday, 5 December, 2017

Time: 2.30 – 4.30pm

Venue: Seminar Room, Milroy Lodge,
15 Bedbrook Place, Shenton Park

Cost: PCWA members free, non-members \$40
