GOALS OF PATIENT CARE UPDATE

You are invited to a Palliative Care WA Sector Forum that will provide the latest WA and national updates on the Goals of Patient Care project, on Thursday 17 September 2020.

The topic

A Goals of Patient Care form has been developed to provide a clear, consistent and effective approach to establishing the goals of medical care for patients admitted into WA hospitals who are also experiencing clinical deterioration. Introduced last year, this document aimed to prompt and facilitate proactive shared decision making between treating clinicians, patients and their families.

Presented by Dr Simon Towler, this sector forum will provide an update on the Goals of Patient Care project, looking at how it is working in our hospitals, what the interaction with patients and their families has been like to date, and how the National Goals of Care Collaborative is progressing.

The cost

Recognising that COVID-19 has had an economic impact on our community and our sector, we are providing this sector forum as a FREE event.

Thursday 17 September, 4:00 – 5:30pm

Attendance options

- In-person at the Seminar Room, 15 Bedbrook place, Shenton Park – light refreshments will be provided (limit of 30)
- Online via Zoom

Register

<https://pcwagoalsofpatientcareforum.eventbrite.com.au>

You can nominate how you are attending when you register.

The Speaker

Dr Simon Towler has expertise in all aspects of intensive care and is currently a specialist in intensive care at Fiona Stanley Hospital. As the Clinical Lead for Goals of Patient Care, Simon works with WA Health and the Australian Digital Health Agency on the National Goals of Care Collaborative. This group aims to increase the use of My Health Record for storing and facilitating ease of access to a range of end-of-life planning documents.
